(Specialization in Software Engineering)

Dharmaraja College, Kandy

Aug 2011

GCE Advanced Level (Mathematics - English Medium)

Physics	C
Combined Mathematics	S
Chemistry	S
English	A

PROJECTS

Content Based Image Classification Algorithm

We were tasked with developing an algorithm to classify natural outdoor and indoor scenery images into predefined classes. The algorithm was built to segment an image, form objects from the segmented image, identify the objects in the image using machine learning algorithms, and classify the images into predefined classes such as beaches, sunsets, mountains, waterfalls, urban areas etc.
